When Masterful Drywall Craftsmanship is Priority One for Your Custom Homes

Just about any drywall contractor can put up straight walls. Austin is crawling with average contractors. However, your luxury, custom developments — your high-end clientele — demand more. Much more.

That's where Elite Drywall comes in.

Our team consists of master drywall technicians who **study, practice and perfect their craft**. From Day One, you see the difference in their appearance, timeliness and positive attitudes. During construction, you see the difference in their speed, their knowledge and their professionalism.

Of course, you see the REAL difference when the job is done. Differences such as:

- **Entryway arches that blow away the homeowners' expectations**
- Domed ceilings that resemble a turn of the century cathedral
- **Extraordinary finishes that are hand-applied and worth every hour of painstaking detail**

Here are the Top 6 Reasons why Austin's finest homebuilders consistently choose Elite Drywall:

- 1) **Extraordinary Technical Skills** — We've spent YEARS mastering today's most sought-after drywall applications
- 2) **Superior Supervision** — Every project on time, on budget, on point
- 3) **All the Special Finishes You Demand** — Our techniques and finishes are why builders keep calling us back
- 4) **Timely Project / Callback Services** — Let us prove just how fast and responsive our team can be
- 5) **Competitive Pricing** — We may discount our rates. But never our skill set and finished results.
- 6) **Exceptional Cleanliness** — When done, it's like we were never even there — Not a speck of dust!

From framing to flooring to fixtures, you want every phase of your homes to make a bold statement. To attract the most distinguished clientele. To attract the highest price possible. That's why you need far more than "a few guys and a truck".

You need **THE elite drywall technicians in Central Texas. You need Elite Drywall.**

Let us PROVE our responsiveness, professionalism and competitive pricing.

Our Work

Bring Us Your Most Complex and Custom Plans — Our Superior Drywall Team Will Exceed Your Expectations

*"Stunning."
"Absolutely Amazing!"
"A Work of Art!"*

It happens most every time. Once your crew sees our finished product, they are simply amazed. Then, the second the homeowner first sees how we turned a house into the home of their dreams, they're practically speechless.

Whether it's a multimillion-dollar home, a whole luxury development or a state-of-the-art commercial building, the drywall work we do is designed to impress. Sure, our experienced team will make your walk-in closets, master bedroom and kitchens shine. But it's the **specialty architecture, applications, finishes and textures** that put us in a class by ourselves.

Advanced Technical Skills

Bring us your most complex and demanding drywall projects. That's what sets us apart. Throughout this page are a handful of our many advanced applications. Every detail, every square inch is perfected. Some of our advanced techniques include:

Wall Niches – **Recessed drywall niches bring character and charm to any home.** Our wall niches will be seamless and unique whether they're square or curved. Just perfect for a beautiful floral arrangement.

Columns – **Our column work is second-to-none.** Forget about the standard columns you find in too many homes. The columns we introduce to a home make a statement. Modern, rustic, and even resembling old world architecture.

Domed Ceilings – **There’s nothing more dramatic and jaw-dropping than this!** A majestic domed ceiling in the middle of your entryway, hallway, great room or master bedroom. The homeowner will always look up and say, “Wow!” Once you see the attention to detail, you just may do the same.

Arches – **Our archways are seamless.** Like they were designed with your home in mind. There’s no question the arches we create will be perfectly symmetrical, perfectly rounded and perfectly smooth.

Groin Vaults – Also called a Groined Vault, Barrel Vault, or Cross Vault, **this advanced technique scares most drywall teams away. Not us!** At Elite Drywall, we thrive in crafting the most luxurious and inspiring groin vault applications.

Compound Curves, Joint Intersections and Custom Designs – At Elite Drywall, **we welcome your most unique and difficult designs.** That’s where we excel. Whether your drywall needs involve multiple compound curves, advanced joint intersections or custom designs that are unique to your build, let us prove our advanced skillset.

Advanced Finishes

Naturally, the Elite Drywall team handles every conventional type of finish and texture. We take pride in making sure it’s seamless and uniform throughout every plane. In addition, we also provide upgrade finishes that create a custom and elegant result.

Conventional Drywall Finishes and Textures – **Typical drywall textures include “Orange Peel”, “Montgomery Drag”, “Splatter” and more.** Perhaps one of those finishes will be perfect for your homes. Take a look at what makes each finish and texture unique.

Upgrade Finishes – In addition to conventional finishes, we also excel in upgraded finishes such as “Hand Trowel” and “Skip Trowel” textures. **These elegant finishes are designed for high-end homes and resemble a Mediterranean flair.**

Please note that all conventional finishes require finish painting.

“Venetian” Plaster – While this advanced, hand-applied technique takes time, **the finished results are simply extraordinary.** Venetian Plaster incorporates the finish color throughout the material. To enhance the look and make the home more unique, we can finish the surface with a variety of texture — from a coarse sand to a burnished slick finish.

American Clay – Reminiscent of classic wall finishes throughout history, **this hand-applied Earth plaster produces truly impressive results.** This material yields a wide range of textures and colors that are non-dusting, non-toxic and hypoallergenic.

Let us PROVE our responsiveness, professionalism and competitive pricing.

About Us

Top Quality Products. Exceptional Techniques. Expert-Level Training. All Because of Our Extraordinary People.

We started a mission about 13 years ago: To redefine what drywall could be. To take it so much further than a straight wall plane behind a coat of paint.

We knew drywall could make a statement. By turning a cookie cutter house into something magnificent and unique. By introducing the world to majestic domed ceilings, soaring arches and columns that resemble ancient Greek structures. By revealing breathtaking finishes that are hand-applied and worth every minute.

Today, we are proud to be serving Austin and Central Texas with

- The absolute highest level of material qualities
- An application skillset that's second-to-none
- And a level of supervision and communication that's unmatched

And after every million-dollar home, every commercial build, every one-of-a-kind project, they all earn the Elite Drywall name.

With every job we do — whether big or small — our reputation is on the line. That's why every member on our team focuses 100% on these 5 tenets of success:

- Dependability
- Timeliness
- Professionalism
- Cleanliness
- Exceptional Quality

Of course, don't ask us — allow our past clients to tell you how happy they are with our work. Please request a copy of our current reference list with names and contact information.

Let us PROVE our responsiveness, professionalism and competitive pricing.
