Dear Friend:

Visualization: The ability to change your physical, future life simply by using your mind.

You **know** it works – because you've done it **yourself**.

Maybe it was on the golf course and you visualized the ball plinking into the hole.

Or perhaps you visualized yourself giving an important presentation minutes before all eyes were on you.

Yet, your experience with visualization represents only a mere fraction of its incredible capabilities.

I'm writing to you today to show you a side of visualizing that continues to astonish everyone that discovers its real power. Just like it has for 60,000 years!

**Potent enough to
eradicate cancer cells.
Effective enough to
enhance your life.**

The power of visualization goes far beyond a better golf score or tennis game.

Did you know ...

... for 35 years, people have used visualization to help cure cancer? (In fact, it's so effective, many cancer centers now have dedicated visualization facilities)

... visualization is effective in lowering blood pressure, reducing cholesterol, decreasing stress levels and even saving peoples' lives?

... visualization played a significant role in most every major discovery and invention since the beginning of time? (It's the world's oldest achievement tool by centuries!)

When I first learned the impact that visualization can have on your body and your health, I grew excited about the significant impact it could have on YOUR ENTIRE LIFE!

**Visualization:
Still the most EFFECTIVE,**

EFFICIENT, and MOST WIDELY USED achievement tool.

Whether it's finding your ideal career, getting that promotion you've been wanting, losing those extra pounds, dropping a bad habit, repairing a strained relationship or simply improving your golf game – you've tried to make the necessary changes to improve your life.

But today, you're still the same you. Just like the rest of us who have the same dreams of accomplishing far more in life.

To be frank, it's not your fault. Just like most people, you've been taught that achievement takes:

Will power.
Sheer determination.
Practice.
Talent.
And Goals.

That it does. But the so-called experts don't tell you about the one secret achievement ingredient that dramatically improves two things:

- The odds that you'll achieve what you want, and
- The speed in which you achieve it.

Visualizing is that secret achievement tool. It has been proven to make such an impact, just 10 minutes a day for 10 days produces noticeable, life-changing results!

[sidebar in box: "I have listened to many personal growth programs but *The Power of Visualization* by Dr. Lee Pulos is by far the best! Powerful and easy-to-use techniques for manifesting, backed by solid scientific research."

- Michael Quiroz, Sun City, CA]

Just 10 minutes a day for 10 days ...

- **begins to improve your health dramatically.**
- **begins to increase your wealth substantially.**
- **begins to erase years of bad or unhealthy habits.**

**10 minutes total – Less time than your morning shower –
refreshes your entire outlook on life.**

(And we haven't even started talking about how much you'll achieve)

**The greatest INVENTORS, ATHLETES
and LEADERS
already know the power of
VISUALIZATION**

In 500 AD, Tibetan monks sat all night on the crest of a 12,000-foot mountain before an icy stream – naked. Their bodies were continually wrapped in sheets of ice water. The deadly mix of freezing temperatures, relentless winds, and painful ice meant hypothermia, frostbite, and certain death.

Yet, during those long, lonely nights, each monk visualized fire, warmth and comfort to raise their core body temperature. And each survived with zero pain or illness – thanks to visualization.

Visualization: The “Father of Invention”:

Nikola Tesla's 19th century discovery of alternating current (AC) begins like most typical invention stories. He scrutinized the theories, the mechanics and every minute detail. Finally, he built the first motor, and then left it alone where he allowed it to run continuously for 3 months.

What *is* remarkable about Tesla is that the AC model he built and tested for 3 months was inside his head! When he finally was ready to build his first physical prototype, it worked without fail. As he knew it would – *thanks to visualization*.

I use these amazing feats as a demonstration of what truly is possible when you know just how to use the powers of your mind. But these are just a couple of examples ... many more lie ahead – including **your own improved life!**

More than a million more people have used visualization to change their lives.

Lives such as **Tiger Woods** who first visualized winning the Masters at age 12. And he continues to use it most every day.

Lives such as **Arnold Schwarzenegger** who used visualization to become Mr. Olympia 6 times, a leading actor, a successful businessman, as well as, the governor of California.

And lives such as **Walt Disney, Martin Luther King, Jr., Albert Einstein, Thomas Edison, Michael Jordan, Winston Churchill, Beethoven, Napoleon, Carl Lewis, Jack Nicklaus, Alexander Graham Bell, Andrew Carnegie, and MORE!**

And lives of average people:
Bev Danowski just recently used the power of visualization to get a considerable raise.
And the power of visualization helped Joe Voeltner quit smoking and lose 37 pounds.

And now – It's YOUR turn to change anything, improve anything, become anything – using your mind!

First imagine it. Then LIVE it.

It took 60,000 years and more than a million people to change their lives – but now science finally agrees. Today there's solid scientific proof you do actually create your reality with your thoughts -- and not the other way around.

You see, you may have learned that all matter resonates vibrations. And by changing our consciousness through imagery, we change the vibration of our lives.

Yes, what you think about actually comes true!

- Visualize opening up a much larger paycheck, depositing it in your bank, and perhaps buying things you've never been able to afford = **A promotion and significant pay raise in your near future.**
- Visualize a more confident you, with friends surrounding you wherever you go = **A life where more people are drawn to you and want to help you whenever they can.**

Use it to improve your self-image. To help conquer bad habits like smoking or overeating. To reduce stress. To improve your sex life. To reinforce your body's capacity for self-healing.

Bottom line – when you discover the hidden power of visualization, your body gets stronger, your mind gets sharper, your relationships get tighter, your career gets better, and your future gets brighter.
